General:
- Prevents upper airway occlusion
- Has a central lumen
- Indicated if Guedel is not tolerated
- External diameter is measured in French (1F is 0.33mm)
- Correct length is the tip of the nose to the ear

Uses:
1. Prevents upper airway occlusion
2. Can be used as a bite block to protect tongue, ETT or bronchoscope

Features:
(i) are generally made of hard plastic
(ii) have a semicircular design that conforms to the curvature of the palate.
(iii) The oropharyngeal airway holds the tongue away from the posterior pharynx so air can pass through and around the device.
(iv) Guedel has a central opening while Berman has side channels.

General:
- includes Guedel and Berman airways named after those who 1st described them.
